VOLUME CONTENTS

Volume 277

Nos 1–2

Special Issue:

PHYSICS OF SPACE: GROWTH POINTS AND PROBLEMS

Proceedings of the second 'Rencontres de l'Observatoire', Observatoire de Paris, Meudon, France

Guest Editors:
N. MEYER-VERNET, M. MONCUQUET and F. PANTELLINI

Préface ix–xi

Foreword xiii–xv

E.N. PARKER / A Critical Review of Sun-Space Physics 1–11

I. FUNDAMENTAL PROCESSES / *PROCESSUS FONDAMENTAUX*

J.R. JOKIPII / Acceleration and Transport of Energetic Charged Particles in Space 15–26

G. LAVAL / Various Regimes of Cosmic Ray Diffusion in Turbulent Magnetic Fields 27–34

A. GRECO, G. ZIMBARDO, P. VELTRI, A.L. TAKTAKISHVILI and L.M. ZELENYI / Non Gaussian and Non Local Transport in the Earth's Distant Magnetotail 35–38

M.G. PONOMARJOV / Acceleration and Transport of Particles in Collisionless Plasmas: Wakes due to the Interaction with Moving Bodies 39–44

Y. OMURA, H. KOJIMA, T. UMEDA and H. MATSUMOTO / Observational Evidence of Dissipative Small Scale Processes: Geotail Spacecraft Observation and Simulation of Electrostatic Solitary Waves 45–57

F. MOTTEZ / Instabilities and Formation of Coherent Structures 59–70

A.L. TAKTAKISHVILI, A. GRECO, P. VELTRI, G. ZIMBARDO, L.M. ZELENYI and A.V. MILOVANOV / Magnetic Turbulence and Ion Dynamics in the Magnetotail 71–79

R.A. TREUMANN / Statistical Mechanics of Stable States Far from Equilibrium: Thermodynamics of Turbulent Plasmas 81–95

G. ZIMBARDO, P. POMMOIS and P. VELTRI / Magnetic Field Line Transport in the Heliosphere and Energetic Particle Propagation from Corotating Interaction Regions to High Heliographic Latitudes 97–100

G. ZIMBARDO, P. VELTRI and P. POMMOIS / Magnetic Field Line Transport in Anisotropic Magnetic Turbulence: Anomalous, Quasilinear, and Percolative Regimes Versus the Kubo Number 101–102

L. GOMBEROFF and J.A. ARANEDA / Damping Effects on Parametric Decays of Alfvén Waves 103–106

T.S. BASTIAN / Radio Wave Propagation in the Corona and the Interplanetary Medium 107–116

A. MANGENEY / Summary of Session 1: Fundamental Processes in Space Physics from Macroscopic to Microscopic Scales 117–122

II. DUSTY AND EXOTIC PLASMAS
PLASMAS POUSSIÉREUX ET EXOTIQUES

M. ROSENBERG / Some Physical Processes in Dusty Plasmas 125–133

G.R. KHUJADZE, S. POEDTS and A.D. ROGAVA / Shear Induced Phenomena in Dusty Plasma Flows 135–138

Yu.V. DUMIN / Generation of Supercooled Strongly-Coupled Plasma by Artificial Injection into Space 139–142

A. BENUZZI-MOUNAIX, S. BOUQUET, J.-P. CHIÈZE, F. MUCCHIELLI, R. TEYSSIER and F. THAIS / Supernovae Rayleigh-Taylor Instability Experiments on the CEA-Phébus Laser Facility 143–146

III. BASICS OF WINDS / *PHYSIQUE DES VENTS*

F. PANTELLINI and S. LANDI / A Simulation Method for Semicollisional Plasmas 149–152

M.P. RYUTOVA and T.D. TARBELL / On the Magnetic Energy Avalanche in the Solar Atmosphere 153–156

M. VELLI / Hydrodynamics of the Solar Wind Expansion 157–167

J. LEMAIRE and V. PIERRARD / Kinetic Models of Solar and Polar Winds 169–180

M. MAKSIMOVIC, V. PIERRARD and J. LEMAIRE / On the Exospheric Approach for the Solar Wind Acceleration 181–187

K. ISSAUTIER, N. MEYER-VERNET, V. PIERRARD and J. LEMAIRE / Electron Temperature in the Solar Wind from a Kinetic Collisionless Model: Application to High-Latitude Ulysses Observations 189–193

V. PIERRARD, M. MAKSIMOVIC and J. LEMAIRE / Core, Halo and Strahl Electrons in the Solar Wind 195–200

F. LEBLANC and D. HUBERT / A Fokker-Planck Approach for the Expansion of the Fast Solar Wind: Why and How? 201–204

R. LALLEMENT / Heliopause and Asteropauses 205–217

I. VESELOVSKY / Turbulence and Waves in the Solar Wind Formation Region and the Heliosphere 219–224

G. PELLETIER / Jets from Young Stars and Compact Objects Environments 225–234

IV. PLASMAS AROUND PULSARS, PLANETS AND MOONS
PLASMAS AUTOUR DES PULSARS, PLANÈTES ET SATELLITES

V.S. BESKIN / Radio Pulsars – What is to be Done 237–246

K.M. FERRIÈRE / Basics of Rotating Magnetospheres: Equilibrium and Stability 247–257

R.E. JOHNSON and F. LEBLANC / The Physics and Chemistry of Sputtering by Energetic Plasma Ions 259–269

D.F. STROBEL and B.C. WOLVEN / The Atmosphere of Io: Abundances and Sources of Sulfur Dioxide and Atomic Hydrogen 271–287

E.S. BELENKAYA / Two-Dimensional Non-Linear Alfvén Wings Generated by the Electrodynamic Interaction between Callisto and the Jovian Magnetosphere 289–292

P. ZARKA, R.A. TREUMANN, B.P. RYABOV and V.B. RYABOV / Magnetically-Driven Planetary Radio Emissions and Application to Extrasolar Planets 293–300

V. OBSERVATIONS / NEW DETECTION TECHNIQUES
OBSERVATIONS / NOUVELLES TECHNIQUES DE MESURE

F. HENRY, J. CROVISIER, D. BOCKELÉE-MORVAN, H. RAUER and D. LIS / Radio Observations of Ions in Comet Hale-Bopp 303–304

M.R. AELLIG, A.J. LAZARUS, J.C. KASPER and K.W. OGILVIE / Rapid Measurements of Solar Wind Ions with the Triana Plasmag Faraday Cup 305–307

K. ISSAUTIER, M. MONCUQUET, N. MEYER-VERNET, S. HOANG and R. MANNING / Quasi-Thermal Noise Diagnostics in Space Plasmas 309–311

Y.V. CHUGUNOV, A.Y. KAZAROVA, E.A. MAREEV, M. MONCUQUET, K. ISSAUTIER and N. MEYER-VERNET / Quasi-Thermal Noise Spectra Measured by a Dipole Antenna in the Upper Hybrid Frequency Band 313–316

J. GEISWILLER, J.G. TROTIGNON, C. BÉGHIN and E. KOLESNIKOVA / Rosetta Mission Mutual Impedance Probe Modelling: The Short and Long Debye Length Plasma Cases 317–318

N.A. ZABOTIN, A.G. BRONIN, Y.V. CHUGUNOV and E.A. MAREEV / Analytical Approach to Calculate Quasi-Thermal Noise Spectrum in Irregular Plasma 319–322

P.A. DALIN, G.N. ZASTENKER, K.I. PAULARENA and J.D. RICHARDSON / Correlation Dependences Determined by Simultaneous Multispacecraft Observations of Solar Wind and IMF Structures 323–324

H.O. RUCKER, M.Y. BOUDJADA, M. LEITNER, A. LECACHEUX, M. AUBIER, A. KONOVALENKO, P.H.M. GALOPEAU and V. SHAPOSHNIKOV / Developments in Jovian Radio Emissions Tomography and Observations Techniques 325–328

CH. MARQUÉ, P. LANTOS, J.M. DELOUIS and C.E. ALISSANDRAKIS / Radio Observations of Filaments at Metric and Decimetric Wavelengths 329–330

N. MURAVIEVA and Y. TOKAREV / Decametric Sounding of Near Earth Plasma: Correlation and Fractal Analysis of Scintillation Data 331-334

VI. FUTURES / *FUTURS*

R.G. MARSDEN / The Heliosphere after Ullysses 337–347

M.L. GOLDSTEIN / Major Unsolved Problems in Space Plasma Physics 349–369

R.M. BONNET / The Future of Space Science in the 21st Century 371–378

List of Participants 381–387

Volume 277 No. 3

J.O. CAZETTA and W.J. MACIEL / Gravity Distances of Planetary Nebulae II. Application to a Sample of Galactic Objects 393–401

S.N. PANDEY / Brans-Dicke Cosmology with non-vanishing Cosmological Constant and Non-Zero Curvature 403–408

M. RABINOWITZ / Ball Lightning: Manifestation of Cosmic Little Black Holes 409–426

I.A. BARGHOUTHI, V. PIERRARD, A.R. BARAKAT and J. LEMAIRE / A Monte Carlo Simulation of the H^+ Polar Wind: Effect of Velocity Distributions with Kappa Suprathermal Tails 427–436

B. ISHWAR and A. ELIPE / Secular Solutions at Triangular Equilibrium Point in the Generalized Photogravitational Restricted Three Body Problem 437–446

L. HERRERA, A. DI PRISCO and J. MARTÍNEZ / Non-Spherical Sources of Strong Gravitational Fields Out of Hydrostatic Equilibrium 447–460

D.R.K. REDDY and N. VENKATESWARA RAO / Some Cosmological Models in Scalar-Tensor Theory of Gravitation 461–472

A. EL-BASSUNY ALAWY / Stellar CCD Photometry: New Approach Principles and Application 473–495

O.A. POKHOTELOV, O.G. ONISHCHENKO, V.P. PAVLENKO, L. STENFLO, P.K. SHUKLA, A.V. BOGDANOV and F.F. KAMENETS / Nonlinear Drift-Alfvén Waves in Relativistically Hot Multicomponent Plasmas and Their Relevance to the Fine Structure of Pulsar Radioemissions 497–505

Erratum – MINHWAN JANG / Intranight Optical Variability in Seyfert 2 Galaxies 507–515

Volume 277 No. 4

RICHARD I. SHRAGER / On a Three-term Variant of the Lomb Periodogram 519–530

JING HAIRONG, TONG YI, TIAN LIRONG and YANG ZHILIANG / $P - \omega$ Dynamo in Spherical Geometry 531–543

W.J. MACIEL / Helium Contamination from the Progenitor Stars of Planetary Nebulae: The He/H Radial Gradient and the $\Delta Y/\Delta Z$ Enrichment Ratio 545–563

H.M. QIU, G. ZHAO and Z.W. LI / Lithium Abundances in 11 Solar-type Stars 565–577

TELEMACHUS J. KALVOURIDIS / Multiple Periodic Orbits in the Ring Problem: Families of Triple Periodic Orbits 579–614

ZONGJUN NING, QIJUN FU, YIHUA YAN, YUYING LIU, QUANKANG LU and / Solar Radio Bursts on 16 February 1999 615–624

N.C. WICKRAMASINGHE and F. HOYLE / A Bacterial 'Fingerprint' in a Leonid Meteor Train 625–628

Instructions for Authors 629–635
